HOW THIS IS MADE

Stats come straight from the box score. The voice is AI. Every number and name the AI writes is checked against the box score before it prints. Anything that fails gets cut.

THE CALL
FILM ROOM

Fourth quarter, Tides down 14, and the building had started doing math. June Okafor did not do math. She did 31 points, the last 9 of them in a stretch where the Comets forgot what a rebound was. The run hit 14 before anyone called timeout, and overtime felt like a formality with a jump ball. The Comets had it. Then they didn't.

BY THE CALL

11 of 20 from the field, and the 9 that mattered came after the Tides were written off. Initials, never photos.
